

Goal Achievement Framework

Name: _____

Date: _____

Instructions

We all have tons of goals to achieve in life. Whether a goal is trivial or of utmost importance, its achievement largely relies on systematic and organized thinking. We all experience that sudden burst of energy on certain days where we feel like “we can do anything”. But that state doesn’t last for long, does it? In order to ensure the successful achievement of a certain goal you have to lay down a framework that you consistently stick to.

This worksheet is designed to enable you to think systematically about your goal. By the end of this exercise you will have all the clarity you need to achieve your goal, or so we hope.

Define your goal

What is it that you want to achieve? Clearly state your goal. Be as specific as you possibly can be

Break it Down

No goal is simple enough. Break down your goal into its major components or steps that are required for its achievement. Think strategically.

Prioritize Your Steps

Now that you have defined components, rank them. What needs to be done first?

Identify Potential Obstacles

No goal is easy to achieve. There are always barriers along the way, and it's important to be aware of those. What challenges might you encounter? Identify possible obstacles that are in the way of achieving your goals:

Brainstorm Solutions

Brainstorm potential solutions for each obstacle. How can you overcome challenges?

Repeat for all obstacles identified in the previous step.

Identify Resources Needed

Identify the resources (time, money, skills, support) required for achieving your goals. Make sure you list them in order of importance.

Once you think about the goal in this systematic way, it will give you a realistic idea regarding how easy or difficult it is to achieve. Now you know how to approach the goal in a realistic and systematic manner. What's left for you to do is to follow the plan.

Important Note

No plan is ever perfect. So don't regard the above framework as the only way in which to approach your goal. You may find out that you didn't break the goal quite efficiently or that you didn't identify important potential obstacles. The point is, keep revisiting this worksheet. Reflect on what you are doing as you try to achieve the goal. Keep refining the frame .
